

Turnkey Bottling Line Equipment List

Typical modules to review when planning a complete beverage production line

Upstream

- Raw water tank or beverage preparation tank
- Filtration, RO, UV, ozone, sterilization or CIP if required
- PET bottle blowing machine or empty container handling

Filling block

- Rinsing, filling and capping machine
- Can filling and seaming or glass bottle capping if relevant
- Cap elevator, closure handling and inspection points

Downstream and support

- Bottle dryer, labeling and date coding
- Shrink wrapping, carton packing or palletizing
- Conveyors, spare parts, export packing and installation communication
